## Aspiring Graphic Designer

As an education major, I never imagined technology would have such a profound impact on my life. I graduated in 2020 with a degree in elementary education and began teaching technology at a middle school three days after I graduated. At that point in time, learning about and practicing various skills using design technology became a constant for me. I developed a strong passion for creating beautiful products digitally, and yearned to increase my skill and knowledge daily. I am now ready to commit my career to digital and graphic design, and hope I can turn this passion into my every day life.
